

Influenza

SURVEILLANCE REPORT

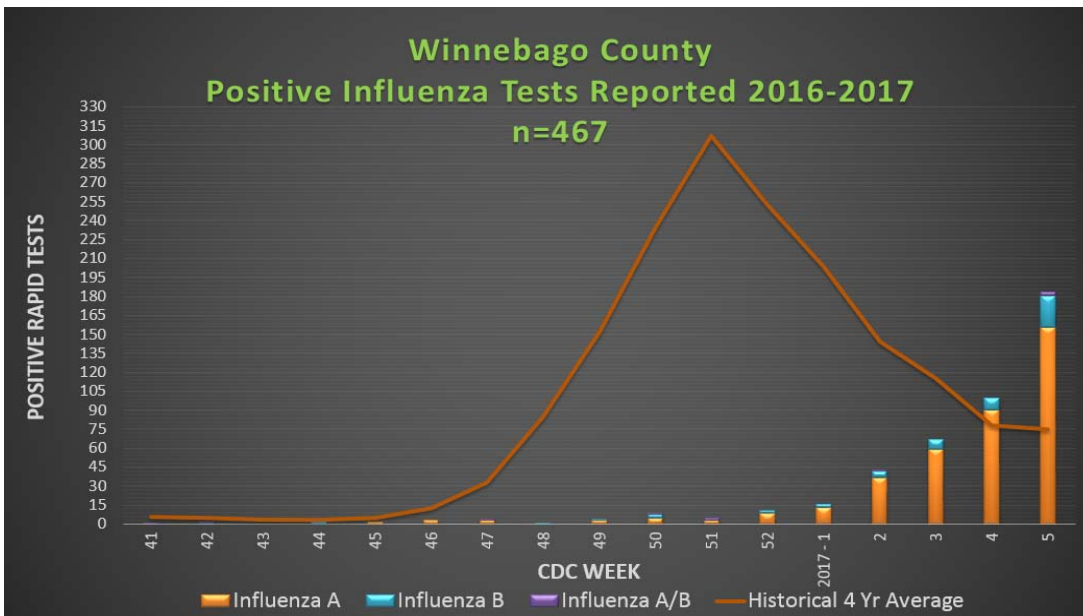

CDC Week 5: Week Ending Saturday, February 4, 2017

Vaccination is the best way to protect against influenza infection.
 All Winnebago County residents aged six months and older should be vaccinated annually.

Weekly Influenza Activity Summary: This week's surveillance activities reports 184 cases of influenza in the County as detailed in this report. Influenza surveillance for Winnebago County involves the weekly collection of data from surveillance partners including hospitals, physicians, clinics, long term care (LTC) facilities and laboratories. Thank you to all of the surveillance partners for their help in collecting this information.

Total Number of Influenza Cases for the Reporting Week			
Age Range	Influenza A	Influenza B	Influenza A&B
0-4	26	3	0
5-17	43	15	0
18-64	75	7	2
65+	12	0	1
TOTALS	156	25	3

← Figure 1: Illustrates the total number of cases reported during the current Influenza Surveillance Period. The four year historical average for the County is noted by the orange line on the graph.

Note: Additional cases of influenza were reported during the current week whose results were not previously reported in prior weeks.

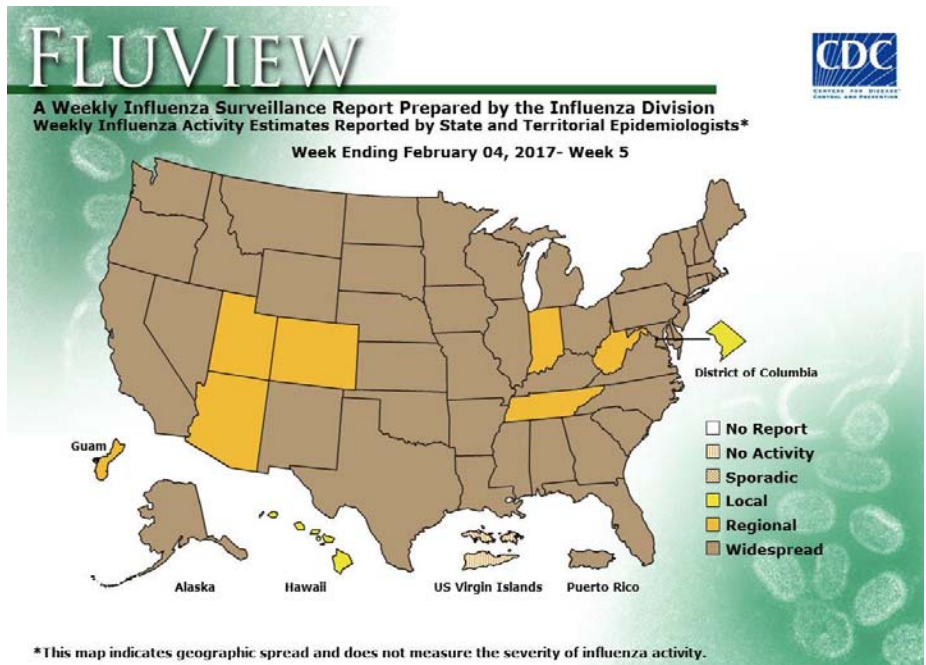

Influenza Surveillance Data Geographic, Outbreaks, Flu View

Geographic Breakdown of Positive Influenza Tests in the County: The Health Department uses surveillance data to monitor positive influenza tests throughout the County by zip codes.

Winnebago County Total Influenza Cases by Zip Code 2016-2017 Season n=467

Total Number of Influenza Cases for the Reporting Week 5 By Zip Code			
Zip Code	Influenza A	Influenza B	Influenza A&B
61016	2	0	0
61063	1	0	0
61072	7	0	0
61073	5	2	0
61080	4	0	0
61088	3	0	0
61101	20	1	0
61102	13	6	1
61103	12	1	0
61104	18	2	0
61107	15	3	0
61108	17	2	0
61109	10	6	2
61111	13	1	0
61114	6	0	0
61115	9	1	0
61132	1	0	0
Totals for the Week	156	25	3

Influenza Outbreak Activity in Long Term Care Facility:

No outbreaks were reported during this week. The Health Department uses surveillance data to monitor influenza outbreaks in long term care facilities as part of the community's current activity with influenza. An outbreak is defined as two or more cases of ILI occurring within 72 hours among residents of a facility.

Influenza Like Illness¹ (ILI) Reported on a Local and State Level

**Percentage of ILI Cases Reported From
Sentinel Providers in Winnebago County
2016-2017 Influenza Season**

← Figure 3: Illustrates the percentage emergency room visits with a complaint of ILI reported during the surveillance week compared to the expected percentage and the baseline percentage for ILI.

Table 1 ↓: Illustrates the actual number of emergency room visits with a complaint of ILI reported during each surveillance week compared to the expected number of ILI complaints.

Actual Number of ILI Cases Reported in Winnebago County 2016-2017 Influenza Season		
CDC Week	Actual Number	Expected Number
2017- 01	42	19.5
02	41	20.3
03	55	21.7
04	43	22.7
05	52	23.9
SEASON TOTAL	636	323.8

← Figure 4: Illustrates the percentage emergency room visits with a complaint of ILI reported during the surveillance week across the State of Illinois.

Regional Sentinel Reports

Percent of ILI Reported From Sentinel Providers by Region, Illinois, Influenza
Season 2016-2017

¹ ILI "Influenza like Illness" is defined as fever $\geq 100^{\circ}\text{F}$ and cough and/or sore throat.
